The Contracts of Carriage of Goods by Sea by Reference to International Instruments Such as the Hague-Visby Rules May 26 2022 Essay from the year 2017 in the subject Law - Civil / Private / Trade / Anti Trust Law / Business Law, grade: 71, Coventry University, course: Oil, Gas and Energy Law, language: English, abstract: This essay will critically discuss the contracts of carriage of goods by sea which are covered by a bill of lading by making reference to governing international instruments such as the Hague-Visby Rules. It is right to say that trade in goods represent an essential share in the gross domestic product (GDP) of most states or regions, and that international trade transactions continue to support significantly, the economic growth and development of various nations. However, it must be noted that this trade is largely dependent on the transportation of such goods from one place to another except, of course, where the sale relates to electronic items such as software and electronic books. Otherwise, transportation is integral to international trade and depending on the sale contract (e.g. cost, insurance, freight – CIF or free on board - FOB) between the seller and the buyer, the seller is usually responsible for arranging for the transportation of the cargo from his country to the buyer's country. The transportation of goods may be by air, road, rail, or sea. The transportation of goods, by whatever mode, must be done in a safe and efficient manner if the parties to the transaction are to be satisfied and trade relations, sustained. Therefore, it is paramount to have in place binding agreement between parties to any contract for the transportation of goods as well as laws which create, unify and, if necessary, regulate the transactions by setting minimum or further obligations, liabilities and rights for the parties.

Right of Control in the Law of Carriage of Goods by Sea May 14 2021 In the United Nations Convention on Contracts for the International Carriage of Goods Wholly or Partly by Sea 2009 (known as "the Rotterdam Rules"), the right of control exists for the first time in the international legislation on the carriage of goods by sea. It was designed to provide those with cargo interests with the right to give instructions to the carrier for variations in the contract of carriage by sea. However, it is unknown whether this right is appropriate for the law and practice of carriage of goods by sea. This book is to examine the right of control in the context of the Rotterdam Rules, non-sea carriage conventions, domestic judicial practices and international shipping trade. It is concluded that the right of control in the Rotterdam Rules is not an appropriate concept for the international law of carriage of goods by sea. The author, therefore, proposes new provisions on the basis of Section 7-303 of the US Uniform Commercial Code in the form of model law or model provisions for future legislation or protocol of the Rotterdam Rules.

Treatise on the Law Relating to the Carriage of Goods by Sea Jan 28 2020

International Trade and Carriage of Goods Dec 29 2019 This book consists of edited versions of the papers delivered at the Institute of International Shipping and Trade Law 's 11th International Colloquium, held at Swansea Law School in September 2015. Featuring a team of contributors at the top of their profession, both in practice and academia, these papers have been carefully co-ordinated so as to ensure to give the reader a first class insight into the issues surrounding international sale and carriage contracts. The book is set out in three parts: Part I offers a detailed and critical analysis on emerging issues and unresolved questions in international sales and the carriage contracts affected to facilitate such sales. Part II critically and thoroughly analyses the legal issues that often arise in the context of security over goods, letters of credit and similar documents. Part III is dedicated to a critical and up-to-date discussion on matters concerning cargo insurance in this context. With its breadth of coverage and high-quality analysis, this book is vital reading for both professional and academic readers with an interest in international trade and carriage of goods.

The World of Goods Jun 26 2022 It is well-understood that the consumption of goods plays an important, symbolic role in the way human beings communicate, create identity, and establish relationships. What is less well-known is that the pattern of their flow shapes society in fundamental ways. In this book the renowned anthropologist Mary Douglas and economist Baron Isherwood overturn arguments about consumption that rely on received economic and psychological explanations. They ask new questions about why people save, why they spend, what they buy, and why they sometimes-but not always-make fine distinctions about quality. Instead of regarding consumption as a private means of satisfying one 's preferences, they show how goods are a vital information system, used by human beings to fulfill their intentions towards one another. They also consider the implications of the social role of goods for a new vision for social policy, arguing that poverty is caused as much by the erosion of local communities and networks as it is by lack of possessions, and contrast small-scale with large-scale consumption in the household. A radical rethinking of consumerism, inequality and social capital, The World of Goods is a classic of economic anthropology whose insights remain compelling and urgent. This Routledge Classics edition includes a new foreword by Richard Wilk. "Forget that commodities are good for eating, clothing, and shelter; forget their usefulness and try instead the idea that commodities are good for thinking." – Mary Douglas and Baron Isherwood

Transport Documents in Carriage of Goods by Sea Nov 07 2020 Bringing a fresh, comparative approach to transport documents used in the carriage of goods by sea, this book covers bills of lading, sea waybills, ship's delivery orders, multimodal transport documents, and electronic transport documents. The book covers historic developments, current conventions, and thoughts for the future on these transport documents; and delves deeply into the legal issues concerning them. It represents a comprehensive compilation of case and statute law from around the world on this subject. In addition to English law, the book covers American, French, German, and Italian laws, as well as the laws of several East Asian jurisdictions (China, Japan, South Korea). Primarily, the book will be of use to maritime law scholars and students, and lawyers who deal with shipping. It may also be of interest to international traders, banks, and ship masters and officers.

The International Sale of Goods Aug 17 2021 The fourth edition of this text on all aspects of international trade law has been updated to incorporate and analyse the major recent developments, both in English law

and contracts under the United Nations Convention on Contracts for the International Sale of Goods (CISG). As well as contract law, the book also covers property matters and addresses those issues which arise from the use of documents of title, such as marine bills of lading. There is extensive treatment of the rights and duties of both the buyer and the seller, and sale contracts are considered alongside other contracts such as charter parties and letter of credit contracts. The CISG material has been significantly developed in this fourth edition and there is more extensive treatment of such matters as remedies, passing of property, standard form contracts, and the international dealing of commodities.

Carriage of Goods by Sea Oct 26 2019 Carriage of good by sea under a bill of lading has been the most popular arrangement for transporting goods by sea in the whole world. The rules governing it are going through a transformation due to changes in the transportation process, namely for containerisation. This work recognizes the dire need for a harmonized set of rules for carriage of goods by sea and looks at different major rules and what they offer for shippers and carriers and whether the UNCITRAL rules meet the interests of both parties. Practical application of uniform international carriage rules is analyzed in the light of national law governing carriage of goods by sea of Estonia as well as European Union legislation regarding shipping.

The Worth of Goods Mar 31 2020 How do we place value on goods - and, importantly, why? Valuation and pricing are core issues in the market economy, but understanding of these concepts and their interrelation is weak. In response, The Worth of Goods takes a sociological approach to the perennial but

timely question of what makes a product valuable. Structured in three parts, it first examines value in the broader sense - moral values and how they are formed, and the relations between economic and non-economic values - discussing such matters as the value of an oil spill, the price of a scientific paper, value in ethical consumption, and imaginative value. The second part discusses the issues surrounding valuation in aesthetic markets, specifically wine, fashion models, art, and the creative industries. The third part analyzes valuation in financial markets - credit rating agencies, stock exchange markets, and industrial production. This pioneering volume brings together leading social scientists to provide a range of theoretical tools and case studies for understanding price and the creation of value in markets within social and cultural contexts and preconditions. It is an important source for scholars in economics, sociology, anthropology, and political science interested in how markets work, and how value is established.
