**The Oxford Handbook of Financial Regulation** Jan 22 2022 The financial system and its regulation have undergone exponential growth and dramatic reform over the last thirty years. This period has witnessed major developments in the nature and intensity of financial markets, as well as repeated cycles of regulatory reform and development, often linked to crisis conditions. The recent financial crisis has led to unparalleled interest in financial regulation from policymakers, economists, legal practitioners, and the academic community, and has prompted large-scale regulatory reform. The Oxford Handbook of Financial Regulation is the first comprehensive, authoritative, and state of the art account of the nature of financial regulation. Written by an international team of leading scholars in the field, it takes a contextual and comparative approach to examine scholarly, policy, and regulatory developments in the past three decades. The first three parts of the Handbook address the underpinning horizontal themes which arise in financial regulation: financial systems and regulation; the organization of financial system regulation, including regional examples from the EU and the US; and the delivery of outcomes and regulatory techniques. The final three Parts address the perennial objectives of financial regulation, widely regarded as the anchors of financial regulation internationally: financial stability, market efficiency, integrity, and transparency; and consumer protection. The Oxford Handbook of Financial Regulation is an invaluable resource for scholars and students of financial regulation, economists, policy-makers and regulators.

**Leadership and Literacy** Dec 21 2021 This book focuses on what school leaders need to know and understand about leadership for learning, and for learning to read in particular. It brings together theory, research and practice on leadership for literacy. The book reports on the findings from six studies that followed school principals from their involvement in a professional learning program consisting of five modules on leadership and the teaching of reading, to implementation action in their schools. It describes how they applied a range of strategies to create leadership partnerships with their teachers, pursuing eight related dimensions from a Leadership for Learning framework or blueprint. The early chapters of the book feature the use of practical tools as a focus for leadership activity. These chapters consider, for example, how principals and teachers can develop deeper understandings of their schools' contexts; how professional discussions can be conducted with a process called 'disciplined dialogue'; and how principals might encourage approaches to shared leadership with their teachers. The overall findings presented in this book emphasise five positive positions on leadership for learning to read: the importance of an agreed moral purpose; sharing leadership for improvement; understanding what learning to read involves; implementing and evaluating reading interventions; and recognising the need for support for leaders' learning on-the-job.

**Engaging Boys in Active Literacy** Mar 24 2022 Too many boys do not like to read, are choosing not to read, and are suffering academically as a result. All concerned adults need to redouble their efforts to ensure that boys who bring the greatest challenges to our classrooms and schools receive responsive literacy texts and practices to increase their chances for academic, personal, and occupational success. This book is more than a compendium of techniques, it also provides an analysis of the research literature on central issues and related aspects of literacy and learning for boys. The author identifies issues that impinge on boys' literacy development and explores what the research literature has to say about these issues. The descriptions of how teachers have used engaging texts and practices to help boys overcome low literacy engagement and skill in order to stay on course as readers and writers are highly informative and practical as models of best practice.

**Technology and the Psychology of Second Language Learners and Users** Jul 24 2019 This edited volume brings together large-scale research as well as case studies from a range of geographical contexts and represents a variety of educational settings involving second language learners and users. Its aim is to explore the interrelated issues of psychology and technology use in second language learning settings as well as in more autonomous environments. As language learning professionals continue to devote more time and attention to making various technological tools an integral part of the classroom, it is just as important to understand the influences that these tools have on the psychological state of the learners who use them. In consideration of this objective, the volume examines factors such as learner attitudes and motivation, emotion and behaviour,

and the cognitive processes that are at play in the minds of the language users. This volume will be of interest not only to language teachers but also to researchers working in second language acquisition (SLA), applied linguistics, and educational psychology.

**Exploring the Effectiveness of Online Education in K-12 Environments** Jan 10 2021 The integration of technology in classrooms is rapidly emerging as a way to provide more educational opportunities for students. As virtual learning environments become more popular, evaluating the impact of this technology on student success is vital. Exploring the Effectiveness of Online Education in K-12 Environments combines empirical evidence and best practices in current K-12 distance learning and virtual schools. Emphasizing current research and opportunities, this book is an all-inclusive reference source for administrators, teachers, researchers, teacher educators, and policymakers interested in the development and implementation of blended and electronic learning in primary and secondary education.

**Political Pressures on Educational and Social Research** Nov 27 2019 Political Pressures on Educational and Social Research draws upon a variety of theoretical and methodological approaches to consider the problems that can arise when research findings diverge from political directions for policy. Chapters explore the impacts this can have on the researchers, as well as the influence it has on the research, including the methodology and the publication of results. The book offers innovative ways of seeing how these connect, overlap and interact, revealing particular issues of concern for researchers and evaluators in the context of research internationally. Key topics include the power and positioning of research, evidence based policy development, ethics and the importance of research that seeks to explore and discover knowledge. The book is divided into two sections. The first presents chapters from international academics, which provide a theoretical underpinning and discussion of power, policy, ethics and their influence on research resourcing, autonomy, purpose and methodology. The second section explores specific case studies and instances from the authors' own experiences in the field. This book offers an interesting and enlightening insight into the sometimes political nature of research and will appeal to researchers, evaluators and postgraduate students in the fields of education and the social sciences. It will be of particular interest to those studying research methods.

**Information Technologies and Economic Development in Latin America** Aug 24 2019 Information Technologies and Economic Development in Latin America provides a collection of rigorous empirical studies that contributes to a better understanding of the role and impact of old and new information technologies on Latin American economic development. It provides evidence using randomized and quasi-experimental designed studies for different information and communication technologies interventions. In evaluating their development impact a critical concern has been to contribute to the little existing evidence. In fact, whereas many ICT projects in the developing world have been promoted by multilateral organizations, bilateral aid agencies and nongovernmental organizations in recent years, the extent to which these interventions and policies actually contribute to the development of the region is unclear. The book provides evidence on what works and what does not.

**Reading Poverty in America** Aug 17 2021 In this book Shannon's major premise remains the same as his 1998 Reading Poverty: Poverty has everything to do with American public schooling—how it is theorized, how it is organized, and how it runs. Competing ideological representations of poverty underlie school assumptions about intelligence, character, textbook content, lesson formats, national standards, standardized achievement tests, and business/school partnerships and frame our considerations of each. In this new edition, Shannon provides an update of the ideological struggles to name and respond to poverty through the design, content, and pedagogy of reading education, showing how, through their representations and framing, advocates of liberal, conservative, and neoliberal interpretations attempt the ideological practice of teaching the public who they are, what they should know, and what they should value about equality, civic society, and reading. For those who decline these offers, Shannon presents radical democratic interpretations of the relationship between poverty and reading education that position the poor, the public, students, and teachers as agents in redistribution of economic, cultural, and political capital in the United States.

**Reading in a Participatory Culture** Nov 07 2020 Building on the groundbreaking research of the MacArthur Foundation's Digital Media and Learning initiative, this book crosses the divide between digital literacies and traditional print culture to engage a generation of students who can read with a book in one hand and a mouse in the other. Reading in a Participatory Culture tells the story of an innovative experiment that brought together playwright and director Ricardo Pitts-Wiley, Melville scholar Wyn Kelley, and new media scholar Henry Jenkins to develop an exciting new curriculum to reshape the middle- and high-school English language arts classroom. This book offers highlights from the resources developed for teaching Herman Melville's Moby-Dick and outlines basic principles of design, implementation, and assessment that can be applied to any

text.

**Warthogs** Jul 16 2021 Warthogs are named for the thick knobs of skin between their eyes and snouts. **Connected Learning** Jun 14 2021 How does the world's oral majority--adults with limited formal education (ALFE)--really prefer to learn? Few pause long enough to ask those who eschew print. The result of scholarly research and prolonged immersion in the Cambodian culture, Connected Learning exposes the truth about orality--the shame associated with limited formal education; the unfortunate misnomer that is orality; the place of spirituality, grace, and hope; and the obvious but overlooked learning preferences. ALFE have different ways of learning and knowing, a different epistemology and culture from print learners, even though we all begin alike. The choice is not between Ong's orality or literacy, but between learning from people or from print. Dr. Thigpen, a veteran cross-cultural worker, shares remedies for the hegemony and inequities unwittingly fostered by the literate minority. In a dominant culture where learning from people is prime, how can educators with a preference for print adapt? Providing an important tool in the Learning Quadrants diagram, Connected Learning advises teaching to the quadrant and calls for seven necessary shifts in teaching. Anyone versed in orality will admit these findings have "global implications and applications" (Steffen). The reader who heeds will positively impact a huge portion of humanity.
