The African Book Publishing Record Nov 16 2021

The Degenerates Jan 06 2021 “Respectful, unflinching, and eye-opening.” —Kirkus Reviews “Historical fiction that not only depicts a cruel, horrifying reality but also the strength and courage of the people who had to endure it.” —Booklist In the tradition of *Girl, Interrupted*, this fiery historical novel follows four young women in the early 20th century whose lives intersect when they are locked up by a world that took

the poor, the disabled, the marginalized-and institutionalized them for life. The Massachusetts School for the Feeble-Minded is not a happy place. The young women who are already there certainly don't think so. Not Maxine, who is doing everything she can to protect her younger sister Rose in an institution where vicious attendants and bullying older girls treat them as the morons, imbeciles, and idiots the doctors have deemed them to be. Not Alice, either, who was left there when her brother couldn't bring himself to support a sister with a club foot. And not London, who has just been dragged there from the best foster situation she's ever had, thanks to one unexpected, life-altering moment. Each girl is determined to change her fate, no matter what it takes.

Jsl Vol 8-N5 Apr 21 2022 The Journal of School Leadership is broadening the conversation about schools and leadership and is currently accepting manuscripts. We welcome manuscripts based on cutting-edge research from a wide variety of theoretical perspectives and methodological orientations. The editorial team is particularly interested in working with international authors, authors from traditionally marginalized populations, and in work that is relevant to practitioners around the world. Growing numbers of educators and professors look to the six bimonthly issues to: deal with problems directly related to contemporary school leadership practice teach courses on school leadership and policy use as a quality reference in writing articles about school leadership and improvement.

Fox and McDonald's Introduction to Fluid Mechanics Mar 28 2020 Through ten editions, Fox and McDonald's Introduction to Fluid Mechanics has helped students

understand the physical concepts, basic principles, and analysis methods of fluid mechanics. This market-leading textbook provides a balanced, systematic approach to mastering critical concepts with the proven Fox-McDonald solution methodology. In-depth yet accessible chapters present governing equations, clearly state assumptions, and relate mathematical results to corresponding physical behavior. Emphasis is placed on the use of control volumes to support a practical, theoretically-inclusive problem-solving approach to the subject. Each comprehensive chapter includes numerous, easy-to-follow examples that illustrate good solution technique and explain challenging points. A broad range of carefully selected topics describe how to apply the governing equations to various problems, and explain physical concepts to enable students to model real-world fluid flow situations. Topics include flow measurement, dimensional analysis and similitude, flow in pipes, ducts, and open channels, fluid machinery, and more. To enhance student learning, the book incorporates numerous pedagogical features including chapter summaries and learning objectives, end-of-chapter problems, useful equations, and design and open-ended problems that encourage students to apply fluid mechanics principles to the design of devices and systems.

Technology and the Trajectory of Myth Aug 21 2019 This book presents an entirely new way of understanding technology, as the successor to the dominant ideologies that have underpinned the thought and practices of the Western world. Like the preceding ideologies of Deity, State and Market, technology displays the features of a modern myth,

promising to deal with our existential concerns on condition of our subjection to them. Utilising robust empirical evidence, Lyria Bennett Moses and David Grant argue that the pathway out of this mythological maze is the production of means to establish a new sense of political, corporate and personal self-responsibility.

The Confluence of Wisdom Along the Silk Road Sep 21 2019 For centuries along the vibrant cultural corridor of the Silk Road of Central Asia, philosophers and thinkers from Hellenic, Chinese and Indian traditions debated existential issues. Out of this stimulating milieu, the iconic poet-mathematician Omar Khayyam emerged in the eleventh century, advancing a transformative intercultural philosophy in his poetic work, the Rubaiyat. Vaziri traces the themes of Khayyam's Rubaiyat back to the highly influential philosophical traditions of the Silk Road and uncovers fascinating parallels in original works by Heraclitus, Zhuangzi (Daoism), Nagarjuna (Mahayana Buddhism), and the Upanishads. In addition, Vaziri's elegant translation and unique classification of the verses of the Rubaiyat reveal an existential roadmap laid out by Khayyam. In this pioneering volume, Vaziri not only fuses the multiple disciplines of literature, philosophy, culture, history and medicine but also takes the approach of the Rubaiyat to a new level, presenting it as a source of wisdom therapy that stands the test of time in the face of doubt and confusion, offering a platform for self-restoration.

International Law Jan 26 2020 This textbook offers for the first time a comprehensive analysis of the classic doctrines and main areas of international law from a European

perspective, meeting the needs of the many European law schools teaching public international law in English. Special attention is devoted to the practice of the European Union, the Council of Europe and European States – both civil law and common law countries – with regard to international law. In particular the book analyses the interplay between international law, EU law and national law in the case law of the Court of Justice of the EU, the European Court of Human Rights and national jurisdictions in Europe. It provides the reader with insights into how the international legal practice of the EU and its Member States impacts the development of international law, both in terms of doctrines such as treaty-making and customary law, the exercise of (extraterritorial) jurisdiction, state responsibility and the settlement of disputes, as well as particular sub-fields of international law, such as human rights law and international economic law. In addition the book covers other important areas such as the use of force and collective security, the law of armed conflict, and global and regional international organisations. It provides European perspectives on all these issues and will be of great value to students, scholars and practitioners.

Business Cooperation Feb 07 2021 This book highlights the phenomenon of business cooperation from different theoretical approaches, and studies the most important aspects of the organisational design of cooperation. Part one studies the economic approach, organisational points of view, strategic points of view and the game theory approach. Part two studies a number of questions related to the analysis of the organisation design and cooperation, and the principal cases in which cooperation has the greatest relevance: technology and international cooperation.

Statistical Power Analysis for the Behavioral Sciences Nov 23 2019 Statistical Power Analysis is a nontechnical guide to power analysis in research planning that provides users of applied statistics with the tools they need for more effective analysis. The Second Edition includes: * a chapter covering power analysis in set correlation and multivariate methods; * a chapter considering effect size, psychometric reliability,

and the efficacy of "qualifying" dependent variables and; * expanded power and sample size tables for multiple regression/correlation.

Fanonian Practices in South Africa Apr 28 2020 Fanonian Practices in South Africa examines Frantz Fanon's relevance to contemporary South African politics, and by extension, research on postcolonial Africa and the tragic development of postcolonies. Here leading Fanon scholar Nigel C. Gibson offers theoretically informed historical analysis, providing crucial scholarly insights into the circumstances that led to the current hegemony of neoliberalism in South Africa.

Lawyers' Ethics and Professional Responsibility Feb 25 2020 This book aims to produce lawyers who can debate, criticise and change professional ethics as well as understand their underlying rationale. Written by the author of the leading work on the subject, *The Ethics and Conduct of Lawyers in England and Wales*, this book is aimed at the undergraduate or postgraduate student taking a half or full course in the subject. The book is divided into four parts dealing with the professional and regulatory framework for delivering legal services, the obligations owed to clients, wider duties and responsibilities and practice settings. It sets out the important background to the modern practice of law, and explains the theoretical underpinning of professional ethics and its everyday application through conduct rules and principles. Extracts from legislation, cases and conduct rules are provided, and comparative issues are considered where relevant. The book is also interactive, raising issues and

posing questions that will encourage students to engage with the material as they read, which will also be helpful for classroom discussion.

Transformative Practice and Research in Organizational Communication May 22 2022 Communication creates organizations, and the ways individuals communicate determines the functions and processes of organizations. Understanding communication challenges is necessary in order to understand organizational successes and organizational change. *Transformative Practice and Research in Organizational Communication* is an essential reference publication featuring the latest scholarly research on the practice of organizational communication. The chapters cover a range of topics such as business expertise, social media, and capitalism. This book is ideally designed for academicians, students, professionals, and managers seeking current research on organizational communication practices.

Quantity Surveying N4 Student's Book Oct 15 2021

The Concept of Abuse in EU Competition Law Jun 18 2019 The objective(s) of Article 102 TFEU, what exactly makes a practice abusive and the standard of harm under Article 102 TFEU have not yet been settled. This lack of clarity creates uncertainty for businesses and, coupled with the current state of economics in this area, raises an important question of legitimacy. Using law and economic approaches, this book inquires into the possible objectives of

Article 102 TFEU and proposes a modern approach to interpreting 'abuse'. In doing so, this book establishes an overarching concept of 'abuse' that conforms to the historical roots of the provision, to the text of the provision itself, and to modern economic thinking on unilateral conduct. This book therefore inquires into what Article 102 TFEU is about, what it can be about and what it should be about regarding both objectives and scope. The book demonstrates that the separation of exploitative abuse from exclusionary abuse is artificial and unsound. It examines the roots of Article 102 TFEU and the historical context of the adoption of the Treaty, the case law, policy and literature on exploitative abuses and, where relevant, on exclusionary abuses. The book investigates potential objectives, such as fairness and welfare, as well as the potential conflict between such objectives. Finally, it critically assesses the European Commission's modernisation of Article 102 TFEU, before proposing a reformed approach to 'abuse' which is centred on three necessary and sufficient conditions: exploitation, exclusion and a lack of an increase in efficiency.

Personality Theories May 30 2020 'Personality Theories' by Albert Ellis - the founding father of Rational Emotive Behaviour Therapy - provides a comprehensive review of all major theories of personality including theories of personality pathology. Importantly, it critically reviews each of these theories in light of the competing theories as well as recent research.

Violent History of Benevolence May 10 2021 A Violent History of Benevolence traces how normative histories of liberalism, progress, and social work enact and obscure systemic violences. Chris Chapman and A.J. Withers explore how normative social work history is structured in such a way that contemporary social workers can know many details about social work's violences, without ever imagining that they may also be complicit in these violences. Framings of social work history actively create present-day political and ethical irresponsibility, even among those who imagine themselves to be anti-oppressive, liberal, or radical. The authors document many histories usually left out of social work discourse, including communities of Black social workers (who, among other things, never removed children from their homes involuntarily), the role of early social workers in advancing eugenics and mass confinement, and the resonant emergence of colonial education, psychiatry, and the penitentiary in the same decade. Ultimately, A Violent History of Benevolence aims to invite contemporary social workers and others to reflect on the complex nature of contemporary social work, and specifically on the present-day structural violences that social work enacts in the name of benevolence.

Security and International Law Dec 05 2020 Of the many challenges that society faces today, possibly none is more acute than the security of ordinary citizens when faced with a variety of natural or man-made disasters arising from climate and geological catastrophes, including the depletion of natural resources, environmental degradation, food shortages, terrorism, breaches of personal security and human security, or even the global economic crisis. States continue to be faced with a range of security issues arising from contested territorial spaces, military and maritime security and security threats relating to energy, infrastructure and the delivery of essential services. The theme of the book encompasses issues of human, political, military, socio-economic, environmental and energy security and raises two main questions. To what extent can international law address the types of natural and man-made security risks and challenges that threaten our livelihood, or very existence, in the twenty-first century? Where does international law fall short in meeting the problems that arise in different situations of insecurity and how should such shortcomings be addressed?
