The German Question and Other German Questions Nov 27 2019 `...a most significant addition to the literature on its subject.' - Roger Morgan, Professor of Political Science, European University Institute, Florence An unconventional overview of a new and normal Germany fifty years after World War 2 and five years after unification. The authors address the challenges of ageing and migration to a tangled national identity; their impact on a cautious yet resilient society, and an inertial yet dynamic economy; and the frequently surprising ways Germans have learned to cope with one another, redefine and pursue their interests, and deal with a changing world after two dictatorships, two world wars, and one cold war.

Building Sustainable Agriculture for Food Security in the Euro-Mediterranean Area Mar 12 2021 Sustainable agriculture and food security are of particular concern for the countries of the Middle East and North Africa (MENA) region, and represent one of the biggest challenges facing the area. As a consequence of the region's heavy reliance on food imports, the sharp increase in food prices since 2007 and the consequent world food crisis has had macro-economic problems (inflation, trade deficits, fiscal pressure), increased poverty and political instability. This challenge, coupled with the consequences of environmental degradation, water scarcity, urbanization and climate stress, call for the urgent development of sustainable agriculture has mostly been ignored in Euro-Mediterranean relations, due to strong opposition from the EU. However, academics and policymakers have increasingly acknowledged that agriculture that needs to be placed at the core of Euro-Mediterranean regional cooperation. Given the sensitivity and strategic importance of agriculture for both shores of the Mediterranean, the IAI and the OCP Policy Center jointly organized a two-day conference in Rabat on November 20-21, 2014, to discuss food security and agriculture challenges in the framework of Euro-Mediterranean relations. The present volume collects the updated and revised versions of the twelve papers that were discussed in that meeting.

The Making of Feudal Agriculture? May 14 2021 The Register of Laws of the Arabian Gulf offers a single, comprehensive source of key information in the field. No similar work exists in the English language. Drawing on original Arabic sources - invariably very difficult to find either individually or in series - this major loose-leaf work provides a complete database of all laws and regulations originating in each country of the Arabian Gulf.
