Palmer's Index to "The Times" Newspaper Nov 19 2021

Seaforth World Naval Review Apr 12 2021 For over a decade this annual has provided an authoritative summary of all that has happened in the naval world in the previous twelve months, combining regional surveys with one-off major articles on noteworthy new ships and other important developments. Besides the latest warship projects, it also looks at wider issues of significance to navies, such as aviation and weaponry, and calls on expertise from around the globe to give a balanced picture of what is going on and to interpret its significance. The latest of the in-depth ‘Significant Ships’ series cover the US Navy’s America (LHA-6) class amphibious ships; the Singaporean Independence, an indigenous design of Littoral Mission Vessel; and the venerable Type 23 frigate, still the mainstay of the British Royal Navy’s surface fleet. Technological subjects include an analysis of stealth at sea by Norman Friedman, the US Standard missile family by Richard Scott, as well as David Hobbs’ regular review of naval aviation. This year the reviews of specific fleets focus on the navies of Sweden and Nigeria, two medium sized naval powers with very different histories. Firmly established as the only annual naval overview of its type, the World Naval Review is essential reading for anyone – whether enthusiast or professional – interested in contemporary maritime affairs.

Italian Waters Pilot Mar 31 2020 Italian Waters Pilot is the only guide for yachtsmen in English that covers the coasts of the Tyrrhenian Sea, Sardinia, Sicily, the Ionian 'heel' and Malta in one volume. This new tenth edition builds on first-hand research by the authors through the Tuscan islands, along the Tyrrhenian and Ionian coasts, to Sardinia and Sicily, Malta and Gozo. Numerous revisions have been made throughout, with the text, plans and photographs undergoing a complete overhaul. Care has been taken to research the details of marina developments. Where it has been available information is given on proposed changes and extensions to yacht harbours. Marine reserves are now an important feature of the coasts and off-lying islands, particularly in Sardinia and Sicily, and this edition provides updated details of the latest regulations. Climate change and extreme weather events are becoming a major issue and this edition includes a section on the how climate change might affect sailing in the Mediterranean. Italian Waters Pilot is the last word on the area for yachts cruising there and on their way between western and eastern parts of the Mediterranean.

Human African Trypanosomiasis (Sleeping Sickness) Jan 28 2020 As it is a goal to eliminate human African trypanosomiasis (HAT: sleeping sickness) as a public health problem by 2020 and interrupt transmission by 2030, this is a good moment to reflect on what we have achieved, what we want to achieve, and what could get in our way. HAT has a reputation for spectacular reappearances, and the latest peak of 40,000 reported and over 300,000 estimated cases only dates back to 1998. Efforts of the WHO and partners as well as the development of simpler and much better-tolerated treatments, improved diagnostics, and vector control tools made it possible to reduce this number by 95%. Case identification and confirmation remain complex and require specific skills, treatment remains error-prone and reports on long-term survivors have emerged, and the relevance of the animal reservoir for T. b. gambiense HAT needs clarification. In addition, to win the “end game” against this massively stigmatized disease, the human factor will play a key role. This Special Issue addresses many of the burning topics about disease elimination in its 12 research and 7 review articles and one case study. The papers critically reflect the approaches used, investigate the mentioned challenges, and propose novel approaches and interventions from various points of view.

Brazil Cruising Guide May 02 2020 Originally published in France, this cruising guide to Brazil has been produced to the same high standards as Imray's major pilot books. Over 250 harbours and anchorages are described and illustrated in full colour with charts and photographs. 2010 edition.

Proceedings of the Second International Conference on Press-in Engineering 2021, Kochi, Japan May 14 2021 The Second International Conference on Press-in Engineering (ICPE) 2021 was organized by the International Press-in Association (IPA). The conference is held every three years and the main theme this time is "Evolution and Social Contribution of Press-in Engineering for Infrastructure Development, and Disaster Prevention and Mitigation". These proceedings contain 2 keynote lectures, 3 state-of-the-art lectures and about 60 papers from more than 10 countries. This publication provides good practice guidance on the application of the press-in piling method, to satisfy the requirements of geo-structures which are embedded utilizing prefabricated piles. It covers actual examples of the press-in piling method applied to various geo-structures, such as temporary and permanent retaining walls, cofferdams, cut-off walls, foundation piles etc. The content addresses the technical and construction issues relating to the selection of the appropriate type of press-in piling method, in accordance with required structural design criteria and working conditions. The aim of this publication is to concisely describe practical uses of the press-in piling method for project owners, designers, contractors, academic researchers and other people in the construction industry.

International Commercial Courts Dec 21 2021 The book offers a comprehensive analysis of the role, importance and place of international commercial courts in the field of international adjudication from a comparative perspective. In a time where scholarly and academic debates revolve around the issues of the role of law in the post-globalization era, the new international commercial courts seem to be in the position to bridge concerns regarding diminished sovereignty, on the one hand, and the necessity of globalizing dispute resolution, on the other. International commercial courts thus present themselves as the paradigm for the future of adjudication.

The Digitalisation of African Agriculture Report 2018–2019 Apr 24 2022 An inclusive, digitally-enabled agricultural transformation could help achieve meaningful livelihood improvements for Africa’s smallholder farmers and pastoralists. It could drive greater engagement in agriculture from women and youth and create employment opportunities along the value chain.

At CTA we staked a claim on this power of digitalisation to more systematically transform agriculture early on. Digitalisation, focusing on not individual ICTs but the application of these technologies to entire value chains, is a theme that cuts across all of our work. In youth entrepreneurship, we are fostering a new breed of young ICT ‘agripreneurs’. In climate-smart agriculture multiple projects provide information that can help towards building resilience for smallholder farmers. And in women empowerment we are supporting digital platforms to drive greater inclusion for women entrepreneurs in agricultural value chains.

Architect's Legal Handbook Sep 17 2021 The Architect's Legal Handbook is the most widely used reference on the law for practicing architects and the established textbook on law for architectural students. Since the last edition of this book in 2010, the legal landscape in which architecture is practised has changed significantly: the long-standing procurement model with an architect as contract administrator has been challenged by the growing popularity of design and build contracts, contract notices in place of certificates, and novation of architect’s duties. The tenth edition features all the latest developments in the law which affect an architect’s work, as well as providing comprehensive coverage of relevant UK law topics. Key highlights of this edition include: an overview of the legal environment, including contract, tort, and land law; analysis of the statutory framework, including planning law, health and safety, construction legislation, and building regulations in the post-Grenfell legal landscape; procurement, and the major industry construction contract forms; building dispute resolution, including litigation, arbitration, adjudication, and mediation; key fields for the architect in practice, including architects’ registration and professional conduct, contracts with clients and collateral warranties, liability in negligence, and insurance; entirely new chapters on various standard form contracts, architects’ responsibility for the work of others, disciplinary proceedings, and data protection; tables of cases, legislation, statutes, and statutory instruments give a full overview of references cited in the text. The Architect’s Legal Handbook is the essential legal reference work for all architects and students of architecture.

Land Law and the Extractive Industries Sep 25 2019 This book analyses the nexus between land access and the extractive industries in Africa, specifically highlighting the gaps in energy, land and mining laws and the practical solutions needed to settle the increasing number of land disputes in resource-rich areas. Access to land is essential for the successful operation of energy and mining projects. However, there are often social, environmental and economic issues associated with acquiring land for these projects. Socially, many people are relocated; economically, local communities are not given adequate compensation; environmentally, pollution negatively impacts on the agricultural and fishing industries relied on by over 80% of the local communities. Against this stark background, and drawing from the author's fieldwork research, this book addresses the important question of whether the different land tenure systems, coupled with administration and registration procedures, are adequate to address the increasing land disputes in oil and mineral-rich African countries.

Experimental IR Meets Multilinguality, Multimodality, and Interaction Aug 24 2019 This book constitutes the refereed proceedings of the 10th International Conference of the CLEF Association, CLEF 2019, held in Lugano, Switzerland, in September 2019. The conference has a clear focus on experimental information retrieval with special attention to the challenges of multimodality, multilinguality, and interactive search ranging from unstructured to semi structures and structured data. The 7 full papers and 8 short papers presented in this volume were carefully reviewed and selected from 30 submissions. This year, many contributions tackle the social networks with the detection of stances or early identification of depression signs on Twitter in a cross-lingual context. Further this volume presents 7 “best of the labs” papers which were reviewed as a full paper submission with the same review criteria. The labs represented scientific challenges based on new data sets and real world problems in multimodal and multilingual information access. In addition to this, 9 benchmarking labs reported results of their yearlong activities in overview talks and lab sessions.
